

DHARMA PLATFORM TEST USER SESSION

User Testing:
The Dharma Platform

Thursday, October 8, 2015
Drop in 10 am – 4 pm
Bixby Center
17 University Hall
Ground Floor

Jesse Berns, MPH
Director, Field Data Collection Lab
The Impact Lab, Washington DC

The Dharma Platform (dharmaplatform.com), a complete data management solution for individuals, agencies, and policy makers, will be launched in November. Jesse Berns, co-founder of Dharma Platform and UC Berkeley SPH Epidemiology Program alumni, will be on campus and invites any and all persons who perform data analysis, field data collection, or project management as a component of their activities and anyone interested in health technology to come by and 'play' with the Dharma Platform. Your input will help Jesse and her team immensely as 'test users' prior to the official release of the technology.

You as a user tester will play with the web and mobile components for 10-15 minutes, then provide feedback in terms of technology intuitiveness, ease-of-use, and applicability to your current position.

Jesse Berns is a field epidemiologist and clinician with over a decade of service in complex, humanitarian emergencies. Most recently she worked as an emergency epidemiologist for Médecins Sans Frontières throughout the Middle East, sub-Saharan Africa and Latin America in response to conflict, disaster, and infectious disease outbreaks.
